ABOUT US

KitchenCraft is a private indian company which was started in year 2018 but has its roots back to 1982 when the LPG sector was just emerging in various parts of India. The vision of the company is to make the brand "KitchenCraft" synonymous with the small & medium household appliances industry in India. This vision is truly reflected in the products manufactured with high precision in their technologically advanced manufacturing facility. All products are manufactured in house and are embedded with high quality, performance and cost effectiveness. KitchenCraft's products are widely in demand for its easy operations and long functional life.

When KitchenCraft started there was little faith in the gas stoves sector to deliver tangible results. Over the last few years, KitchenCraft has built a successful business while proving that gas stoves can deliver transformative social, financial, and environmental impacts.

Quality is the life. KitchenCraft is an ISO 9001 certified company since its incorporation and manufactures its products as per the norms of IS 4246 of The Bureau of Indian Standards.
